Mopeka® GaugeLink™ BLE & Cellular

ACCURACY ABOVE EVERYTHING

Mopeka® is the global leader in Sonar Tank and Cathodic Protection Monitoring. We understand that Accurate, Reliable and Realtime Tank Monitoring is Critical. Imagine your tanks containing Propane, Butane, Oil, Anhydrous, Water or any other liquid based commodity having an advantage above all others. You'll get that advantage with Mopeka's patented range of Tank Monitoring and Cathodic Protection Monitoring solutions. We harness the power of cutting-edge technologies to ensure you can quickly, easily and above all ACCURATELY monitor your pressurized and non-pressurized tanks in Realtime.

We offer solutions for Pressurized and Non-pressurized Tanks, from 20lb residential grills and RV tanks to industrial tanks over 90,000 gallons. With 95+ years of expertise in technology, engineering, and bulk commodities, we deliver smart solutions to optimize volume management and streamline supply chains.

THE SOLUTION

TURN ANY GAUGE INTO A SMART TANK MONITOR

The **Mopeka® GaugeLink™ platform** transforms traditional mechanical tank gauges into intelligent connected monitoring systems. GaugeLink provides a simple, non-invasive way to upgrade existing tanks with modern monitoring capabilities — **without modifying the tank or replacing the gauge.**

Using Bluetooth or cellular connectivity, GaugeLink allows operators and customers to monitor tank levels and system health through the **Mopeka Dashboard or MopekaIOT Co-Pilot App.**

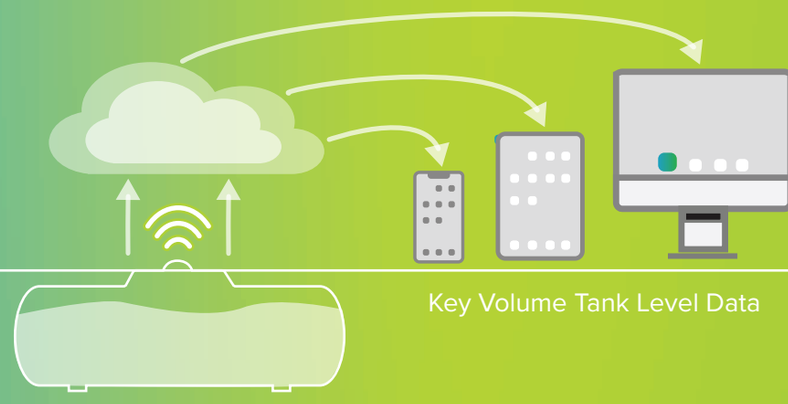

Built on Mopeka's promise of **Accuracy Above Everything™**, GaugeLink delivers a flexible path to smarter tank monitoring.

GAUGELINK – BLE **GAUGELINK - CELLULAR**

KEEP TRACK OF YOUR TANK LEVELS FROM ANYWHERE

With Mopeka® GaugeLink you can monitor you tank levels via BLE or Cellular from your smartphone, tablet or computer.

Key Volume Tank Level Data

Mopeka® GaugeLink™ – BLE and GaugeLink – Cellular

Turn Any Gauge Into a Smart Tank Monitor...The **Mopeka GaugeLink™ platform** transforms traditional mechanical tank gauges into intelligent connected monitoring systems. GaugeLink provides a simple, non-invasive way to upgrade existing tanks with modern monitoring capabilities — **without modifying the tank or replacing the gauge.**

GaugeLink™ – BLE
Bluetooth Tank Gauge Reader

GaugeLink – BLE is a snap-on Bluetooth-enabled gauge reader that attaches directly to an existing mechanical tank gauge. The device reads the gauge mechanically and wirelessly transmits tank data to the **MopekaIOT Co-Pilot App** when the user is within Bluetooth range.

This simple installation instantly converts traditional gauges into connected monitoring devices.

- Works with **all existing JR. and SR. mechanical tank gauges**
- **Read Ready gauge NOT required**
- **Non-invasive snap-on installation**
- No wires and no tank modification required
- Bluetooth-based local monitoring
- Accurate tank level and volume readings
- **Wireless design with up to 10-year battery life**

GaugeLink™ – Cellular
Remote Cellular Tank Monitoring

GaugeLink – Cellular expands the GaugeLink platform by adding a **Mopeka Cellular Gateway**, enabling continuous remote monitoring. With cellular connectivity, users can view tank levels, system status, and connectivity data from virtually anywhere in the world.

- Includes **GaugeLink – BLE plus Mopeka Cellular Gateway**
- Remote access to tank data from anywhere
- Eliminates Bluetooth range limitations
- Ideal for **remote, unattended, seasonal, or fleet tanks**
- **10-year battery life for GaugeLink – BLE**
- **5-year replaceable battery for Cellular Gateway**

ONE APP. ONE DASHBOARD. ONE VIEW.

Monitor all connected tanks through the **Mopeka Dashboard** and/or the **MopekaIOT Co-Pilot App**, providing complete system visibility including:

- Tank level percentage
- Tank volume
- Temperature monitoring (°C / °F)
- Device battery status
- Bluetooth or cellular signal strength
- Firmware version and device information
